1. Introduction

The REGISTRATION package needs to include some data elements found in the Integrated Billing Action file (#350) and Bill/Claims file (#399) in the following reports:

- Former OTH Patient Eligibility Change Report
- Former OTH Patient Detail Report
- Presumptive Psychosis Reconciliation Report
- Presumptive Psychosis Detail Report

The IB*2.0*697 modifies the IBEFSMUT routine to include the partial fill prescription of the return array. The routine provide Integrated Billing (IB) data to Presumptive Psychosis (PP) and Other than Honorable (OTH) billing reports designed within the Registration application that would help Registration and IB users to identify patients that were treated under OTH authority and PP benefits. This is to provide details about eligibility changes and Department of Veterans Affairs (VA) care provided to these patients. The reports are developed in DG namespace but need to be available to both Registration and IB users.

1.1. Purpose

These release notes cover the changes to implement reports that would help billing users to identify patients that were treated under OTH authority and PP. This is to provide details about eligibility changes and VA care provided to these patients.

1.2. Audience

This document targets billing users and administrators that review Former Service Member's and PP episodes of care and released prescription details to determine if potential back-billing is necessary.

2. This Release

The following sections provide a summary of the new features and functions added, enhancements, and modifications to the existing software, and any known issues for IB*2.0*697.

2.1. New Features and Functions Added
